SPMP20255 REV A OCT 2020

Your competition is prepared to meet the full-arch needs of an aging US population.

Are you?

\*In 2018, the over-65 population reached 52 million; by 2025, this group will escalate to 65 million, bringing along with it an increasing number of edentulous and partially edentulous patients.

Source: US Census Bureau

TeethXpress®

Full-Arch, Immediate-Load Courses with Live Surgical & Restorative Demonstration

TeethXpress is a full-arch, immediate-load protocol and comprehensive business program that uses dental practice tools to increase case acceptance.

Your team - surgeon, restorative dentist and lab technician - is trained at a comprehensive, two-day course that includes a live patient surgery with immediate denture conversion, an in-depth clinical hands-on lab and lectures on patient identification, case acceptance and business development strategies.

To achieve the maximum benefit, surgical specialists, referring dental colleagues and a preferred dental laboratory technician should attend as a team. Surgeons are expected to have intermediate to advanced experience in dental implant surgery prior to attending.

### why attend?

Experienced TeethXpress course faculty will train your team on their time-proven methods to build a successful, profitable TeethXpress practice, including:

- marketing training for patient identification and increasing treatment closing percentages
- referral training to create a steady stream of TeethXpress cases
- training on efficient and predictable TeethXpress workflows including live patient surgery & denture conversion
- hands-on workshop - TeethXpress implant placement and immediate fixed denture conversion

## clinical training

When proven clinical techniques are applied, immediate occlusal loading has a documented success rate of over 95 percent.<sup>1</sup> In this course, we will demonstrate:

- live patient implant surgery and the TeethXpress method of immediate, fixed conversion
- best practices for developing a team approach with the surgical specialist, restorative doctor and laboratory technician
- predictable implant placement, including ridge reduction, vertical dimension, anterior/posterior spread, torque values, etc.
- how to minimize chair time for optimal patient care and efficiency

## marketing training

Many practices want to place more dental implants and perform more full-arch cases, but struggle to attract and influence ideal candidates for these large procedures. In this course, we will describe:

- how to cost-effectively identify and attract a consistent stream of TeethXpress cases in your practice, particularly post-pandemic
- a blueprint for patient consultations and how to use proven tools for achieving higher case acceptance
- strategies for establishing and presenting fees and patient financing
- how edentulous, partially-edentulous and fully-dentate immediate-load candidates are motivated differently to accept the TeethXpress procedure

1. Carl Misch, BS, DDS, MDS and Hom-Lay Wang, DDS, MSD 2003-08-01. Implantology: Immediate Occlusal Loading for Fixed Prostheses.

## laboratory training

The TeethXpress treatment planning methodology incorporates the laboratory throughout the process, with special focus on the immediate denture conversion. Laboratory technicians wishing to become proficient and efficient in full-arch, immediate-load will learn:

- effective strategies for treatment planning with the surgical specialist and the restorative dentist
- laboratory conversion techniques through an in-depth hands-on session and observation of the denture conversion process during a live patient surgery
- systems required for becoming the go-to, immediate-load laboratory within your market

## TeethXpress® | schedule\*

### day one

- 7:30am-8:00am: Registration
- 8:00am-12:00pm: Patient Identification & Treatment Workup

- 1:00pm-3:00pm: Case Acceptance Strategies & Treatment Affordability
- 3:00pm-5:00pm: Final Steps

**16 CE credit hours**

\*subject to change

## live patient surgery & denture conversion with a hands-on workshop

Participants will observe a live patient surgery with instruction on bone reduction techniques and implant placement, followed by an immediate-load conversion of a full-arch provisional prosthesis. An in-depth surgical and restorative hands-on, model-based workshop will give each team the opportunity to place implants and perform a “chair-side” provisional denture conversion.

“Great course! Love the lecture and live surgery format, especially as a surgeon! My referrals picked up a lot of good, practical information.”

Dr. Francisco Carlos, Periodontist  
Falls Church, VA

“The hands-on workshop really helped pull it all together.”

Dr. Randall Eggert, Oral Surgeon  
Redmond, WA

# San Diego, CA

Dr. Arshiya Sharafi, Oral Surgeon  
Dr. Andrew Ferrier, Prosthodontist  
Frank Charles Pope and  
Larry Stites, Allure Dental Studio

Venue: BioHorizons Training Center  
4125 Sorrento Valley Blvd, Ste D  
San Diego, CA 92121

Hotel: Hilton La Jolla  
Torrey Pines  
\*Special room block rate will  
be given upon registration.  
Hotel subject to change.

“TeethXpress is an amazing course that our surgery and prosthodontic team attended together. I have been to several full-arch courses and have not met any team as excellent as Dr. Ferrier, Dr. Sharafi and Allure Dental Studio with the amount of cases they have completed.”

Dr. Michael Drone, Prosthodontist  
Valparaiso, IN

# Providence, RI

Dr. Arshiya Sharafi, Oral Surgeon  
Dr. Andrew Ferrier, Prosthodontist  
Richard Napolitano, CDT,  
Precision Craft Dental Lab

Venue: Precision Craft Dental Lab  
37 Thurber Blvd, Bldg B  
Smithfield, RI 02917

Hotel: Omni Providence Hotel  
\*Special room block rate will  
be given upon registration.  
Hotel subject to change.

“The TeethXpress full-arch immediate load course is unquestionably the most well organized, well presented and immediately useful course I have ever taken. Thank you for providing a seamless solution for myself, my team and most importantly, our patients.”

Dr. Fred L. Bye, Periodontist  
Hagerstown, MD

# Greater Cleveland, OH

Dr. Michael H. Morgan, Periodontist  
Dr. Andrew Ferrier, Prosthodontist  
Frank Charles Pope, Allure Dental Studio

Venue: Dental Ceramics Inc.  
3404 Brecksville Rd.  
Richfield, Ohio 44286

Hotel: Hilton Akron/Fairlawn  
\*Special room block rate will be given upon registration.  
Hotel subject to change.

"After attending the TeethXpress course with a group of my referrals, we are pumped about full arch. One referral sent me a consult she saw on Monday immediately after the course. Another said that she has new excitement and passion for dentistry as a result of the course."

Dr. Aaron E. Quitmeyer, Oral Surgeon  
Harrisonburg, VA

## Your competition is ready to meet increasing full-arch demands. Are you?

"I'm exhilarated to be able to look at myself and be proud of what I see."

Millie,  
TeethXpress patient

### Dr. Arshiya Sharafi

#### Oral and Maxillofacial Surgeon

Dr. Sharafi obtained his dental degree at the University of Maryland Dental School. He went on to finish his Oral and Maxillofacial Surgery training at the University of Maryland Medical Center and R. Adam Cowley Shock Trauma Center. He has trained extensively in dentoalveolar surgery, dental implants, reconstructive dental implantology, full-arch teeth-in-a-day procedure, orthognathic surgery, maxillofacial trauma, facial cosmetic surgery, and benign head and neck pathology. Dr. Sharafi is a Diplomate of the American Board of Oral and Maxillofacial Surgeons and a Fellow of the American Association of Oral and Maxillofacial Surgeons. He is also one of a handful of Oral and Maxillofacial Surgeons in California who holds the California Cosmetic Surgery License due to his comprehensive training in cosmetics and reconstructive surgery. Dr. Sharafi is a TeethXpress surgical instructor and has a fellowship program for full-arch treatment in his office. His passion is full-arch rehabilitation and the all-on-x procedure, of which he has done over 3,500 arches in his career. Dr. Sharafi has privileges at Sharp Memorial Hospital and Scripps Mercy Hospital in San Diego.

### Dr. Michael H. Morgan

#### Periodontist

Dr. Morgan received an MS, a Certificate in Periodontology and his DDS from the Ohio State University College of Dentistry. In private practice since 1994, Dr. Morgan has earned a reputation for excellence in implant dentistry and especially complex cases referred to him throughout the region. He also focuses on periodontal plastic surgery and laser assisted periodontal regenerative procedures (LANAP). While maintaining a private practice, Dr. Morgan was also on staff at the Cleveland Clinic Foundation, one of the largest hospital-based dental facilities in the United States, and was a faculty member in Case Western Reserve University's Graduate Periodontology program. In addition to authoring publications, Dr. Morgan has lectured at numerous international, national, regional and local programs during his career.

### Dr. Andrew Ferrier

#### Prosthodontist

Dr. Andrew Ferrier earned his dental degree from UCLA and completed the three-year Prosthodontic Residency Program at UCSF. For the past 13 years, he has treated patients with full arch immediate load treatment concepts in his private practice and for a dental implant center. Dr. Ferrier served as the staff prosthodontist for the Head and Neck surgery department of Kaiser Hospital in Oakland. He has completed over 1,300 arches and conducted thousands of maintenance visits and patient consultations. Dr. Ferrier has held a position of assistant clinical professor at UCSF. He lectures on a broad variety of topics including implants, CEREC, and dental practice management.

### Richard Napolitano, CDT

#### Precision Craft Dental Laboratory, CEO

Richard Napolitano received his associate degree from Durham Technical Institute NC and his Bachelor of Science from Providence College. He is an allied member of the American College of Prosthodontists and the NADL, and he lectures on all aspects of dental laboratory technology, treatment planning, implantology and dental techniques. Richard has 40+ years of expertise in complex restorations and mentoring hundreds of dental care providers and technicians, along with expertise in the latest software applications, CAD/CAM techniques and dental automation. When Precision Craft Dental Laboratory opened in 1972 as a boutique lab, Richard committed himself to three priorities: dental technology, customer service and continuing education. Those same priorities still guide the operation of the state-of-the-art, 14,000 square foot PCDL laboratory.

### Frank Charles Pope

#### Allure Dental Studio, Co-Founder

Frank Charles Pope began his dental technology career in 1980 after completing a three-year National Dental Technology program in Nice, France. He continued his extensive training by attending and studying advanced esthetic techniques from many of the top ceramic masters in France, Germany, Japan and the US. In 1995, Frank Charles joined a nationally recognized esthetic laboratory in Northern California as a master technician and was soon promoted to General Manager. Frank Charles was instrumental in growing that company from 50 to 750 employees. In 2009, he co-founded Allure Dental Studio in Tracy, California. Frank Charles has been involved with restoring thousands of arches and lectures nationally and internationally on the treatment concepts of full-arch, immediate-load.

### Larry Stites

#### Allure Dental Studio, Co-Founder

Larry Stites began his dental technology career in 1975 by attending the dental technology program at San Francisco City College. Larry continued his education by studying advanced esthetic techniques from many of the top ceramic masters from Europe. Larry designed and built a state-of-the-art CAD/CAM department by utilizing several technology platforms. In January 2009, he co-founded Allure Dental Studio in Tracy, California. Internationally recognized as one of today's top educators and digital innovators, he works closely with several leading implant and technology companies as a development partner. Larry maintains a speaking schedule throughout North America.

Register online at [TeethXpressCourses.com](https://TeethXpressCourses.com). Pre-registration is required due to limited seating and necessary course preparations.

For best results, it is strongly recommended that surgical specialists, referring dental colleagues (3 due to space limitations) and a preferred dental laboratory technician attend as a team. Surgeons are expected to have intermediate to advanced experience in dental implant surgery.

## tuition

Includes: 16 hours of Continuing Education, clinical module manual, course literature packet, live patient demonstration, transportation to course from hotel, breakfast, lunch, Friday evening social dinner and a converted denture from the hands-on workshop for the team to take home.

Surgeon: \$3095

Accompanying GP: \$1095

Tuition rate applicable after surgical specialist is registered. They will receive a special code for you to register as part of their team.

Accompanying Lab Technician: \$595
