

TeethXpress®

Live-Patient, Fixed-Hybrid Training

December 5-7, 2024 • Chattanooga, TN

What You'll Experience

This TeethXpress full-arch immediate-load dental implant course is unique. Centered around hands-on, didactic and live-patient training, participants should expect a close mentorship atmosphere throughout this intensive three-day, all-on-x, live-patient dental implant course.

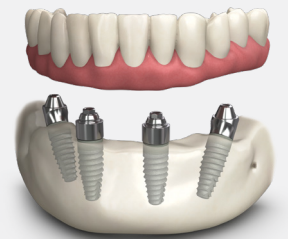

This limited size group will treat actual patients, perform dental implant surgery and deliver full-arch, immediate prostheses.

Instructor was great. Very interactive and great sense of humor!

**-Dr. Natasha Kapoor,
Periodontist**

- Patient evaluation and all-on-x case selection criteria
- Participation in multiple full-arch treatment planning sessions
- Cone-beam CT and other radiographic assessments
- Mechanics of performing full-arch, immediate-load, implant surgery
- Protocols for delayed and immediate full arch
- Practical experience with effective full-arch implant instrumentation
- Training in alveolar management and ridge reduction
- Tactile experience with osteotomy preparation and implant placement
- Proper multi-unit abutment selection and other common prosthetic parts
- Rationale and treatment planning for four, five or six dental implants
- Management of full-arch complications
- Immediate prosthetic delivery
- Fundamental protocols for satisfying the required inter-arch occlusal space
- Rationale for angled and straight posterior dental implants and their advantages and limitations

Very interactive! Enjoyed his lectures and learned a lot!

-Farryn Harrison,
Oral Surgeon

Excellent course!
The materials and instructions were beyond what was expected!

-Dr. James Keith,
General Dentist
