Zygomatic implant complications: prevention, recognition and management

November 3, 2026 | 6:00pm–8:00pm CST | 2 CE hours

Case images courtesy of Dr. Michael Pikos

Zygomatic implants provide a powerful solution for the severely atrophic maxilla, but complications can be significant and challenging to manage. This webinar reviews intraoperative, early postoperative and late postoperative complications, with an emphasis on prevention, early recognition and predictable management. Upon completion of this webinar, participants should be able to:

- Prevent and manage key intraoperative complications associated with zygomatic implant placement.
- Recognize and manage early postoperative complications to minimize morbidity and protect treatment outcomes.
- Diagnose and manage late complications using a systematic approach to implant salvage, revision or removal.

Dr. Michael Pikos

Dr. Michael A. Pikos is a board-certified oral and maxillofacial surgeon and a summa cum laude, Phi Beta Kappa graduate of The Ohio State University. He is the founder and CEO of the Pikos Institute. Since 1990, he has taught advanced bone and soft tissue grafting courses as well as full-arch immediate reconstruction courses to more than 7,000 alumni from all 50 states and 73 countries and territories. He has performed thousands of bone and soft tissue grafting procedures and placed more than 35,000 implants.

Dr. Pikos has lectured extensively on dental implants throughout the United States and internationally. He is a published author, including his recent book, *Bone Augmentation in Implant Dentistry*. Dr. Pikos is the founder and CEO of Coastal Jaw Surgery, a nine-doctor multispecialty practice in Tampa Bay, Florida. He limits his practice exclusively to implant surgical reconstruction.
